DELTA KITS, INC. CUTS THE CORD WITH THE ELITE PLUS UV-LED CURING LAMP

EUGENE, OR – September 27, 2018 - Delta Kits, Inc., the leader in windshield repair and headlight restoration equipment and supplies for over 32 years, is pleased to announce the launch of the Elite Plus, a cordless UV-LED curing light for windshield repair technicians. Like the original Elite, the advanced UV-LED technology of the Elite Plus guarantees a large 2.5 inch by 5.5 inch area with its 7 inline – 8W high-power Light Emitting Diodes (LED). The Elite Plus produces uniform, high-intensity light at a 365 nm wavelength that is optimal for curing windshield repair resin. The irradiance is an astounding 40,000 $\mu\text{W}=\text{cm}^2$, which far exceeds industry standards for corded and cordless UV lights.

The Perfect Solution for Mobile Windshield Repair Technicians

Weighing just 22 oz. including the removable charging cord and 100v – 240v adapter, the Elite Plus is designed to be lightweight and completely portable. What sets the Elite Plus apart from the original Elite is the new cordless design and powerful rechargeable, removable battery that provides up to 50 repairs and can be fully re-charged in 70 minutes. The Elite Plus curing light comes complete with lamp, a rechargeable 12V 1100Ah lithium polymer battery pack, a fused 12V - 24V cigarette lighter power adapter, and a 100V – 240V AC to DC power adapter secured to a tough, tangle resistant 10 foot long (300cm) nylon braided cord.

“The Elite Plus sets a new standard for UV curing lamp technology,” stated Brent Deines, President of Delta Kits Inc. “Because it is cordless but can also be operated while plugged in to any 12V-24V DC or 100-240V AC power source, the Elite Plus replaces virtually all other UV curing lamps, but what is truly amazing is that even when being powered by the battery, it out performs every other DC and AC lamp we compared it to.

About Delta Kits

Founded in 1984, Delta Kits, Inc. specializes in high quality windshield repair and headlight restoration products at affordable prices. Our industry leading tools, resins, and equipment are preferred by professional windshield repair and headlight restoration technicians worldwide and are highly respected for quality, durability, and ease of use.
